The perfect solution for sagging table tops!

Previous rope tensioning systems for table tops have various disadvantages:

- An individual set was custom-made for every table size. This was error-prone and led to longer delivery times.

- As tensioning was placed on the outer edges, it also required various parts such as turnbuckles with left/right-handed thread and unsightly rope shackles.

- The visible mounting plates were an interference.

We reversed the tensioning principle, and re-designed the system from scratch. The result is a universal mounting to straighten out sagging table tops. The fittings are made completely from stainless steel.

Your benefits:

- One size fits all; the ropes can be shortened by the carpenter himself.
- No protruding mounting plates or screw threads.
- Each rope can be tensioned individually in the centre.
- Sleek and functional design.
- Smooth assembly directly with the costumer even later on.

Available in two different models:

Standard model:
Full fittings for customised trimming, for 1 table.
Available in 2 sizes
Rope clips for **screwing** (no special tool needed).
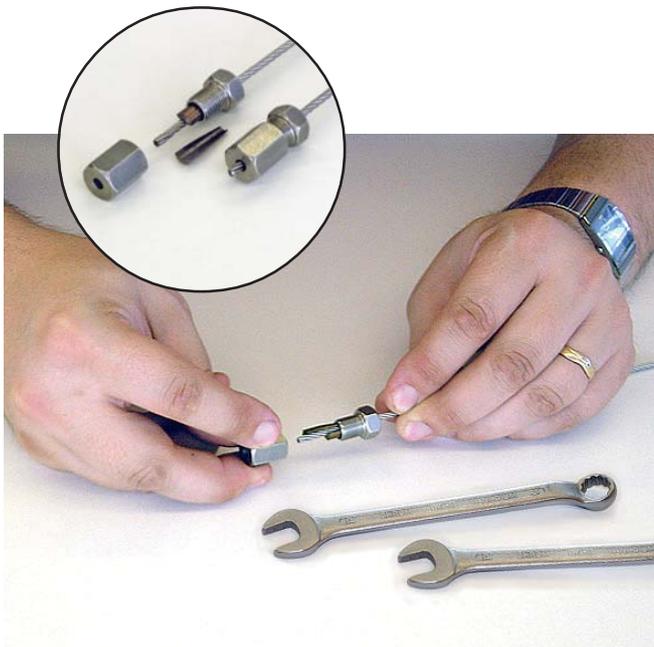

Compressed version:
Full fittings for customised trimming, for 1 table.
Available in 2 sizes
Rope clips for **press fitting** (**pressing tool required!**)
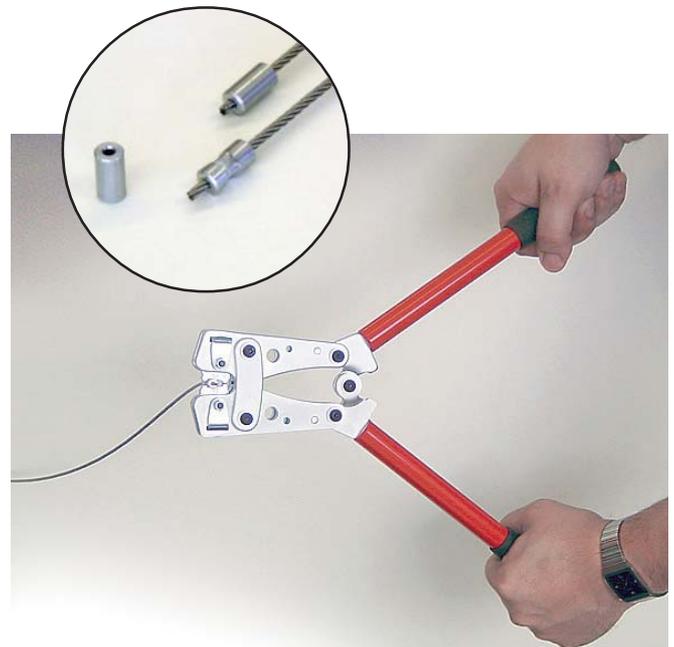

Standard wire rope tensioner — for trimming, with rope clips for **screwing**

Order No.	Description	Material	Base height	Max. table length	per fitting
70.125	Wire rope tensioner	Chrome steel	100 mm	ca. 3000 mm	
70.126	Wire rope tensioner	Chrome steel	150 mm	ca. 4500 mm	

Wire rope tensioner to **compress** — for trimming, with rope clips for **compressing**
(Please note**: compressing tool type 70.139** is required for this item)

Order No.	Description	Material	Base height	Max. table length	per fitting
70.123	Wire rope tensioner	Chrome steel	100 mm	ca. 3000 mm	
70.124	Wire rope tensioner	Chrome steel	150 mm	ca. 4500 mm	

Tool for wire rope tensioner, compressed version — for compressing the rope clips

Order No.	Description	Material	1 piece
70.139	Crimping pliers	Galvanised steel, rubber handle	
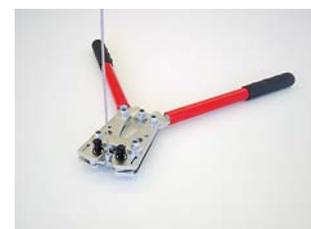

Anti-vibration mounting for wire rope tensioner — prevents rope vibration

Order No.	Description	Material	Size	4-piece set
70.127	Anti-vibration bar	Chrome steel / rubber	Ø 16 x 55 mm	

In some cases, depending on floor quality and room acoustics, the tensioned chrome steel ropes sound like guitar strings when the table is moved suddenly. This accessory prevents this effect.

Anchor plates for wire rope tensioner — including M6 Allen screw

Order No.	Description	Material	Size	4-piece set
70.128	Anchor plates	Chrome steel	Ø 50 x 6 mm	

The anchor plates serve to protect against shearing into softer materials such as chipboard and soft woods. They are not necessary for hard wood plates, but they can also be easily used as decorative elements.

Glass mounting (for tensioned base) — including M8 Allen screw

Order No.	Description	Material	Size	1 piece
70.129	Glass mounting	Chrome steel	Ø 64 x 4 mm	

Wire rope scissors — for clean trimming of wire rope

Order No.	Description	Material	1 piece
70.138	Cable scissors	Hardened steel, rubber handle	

It is recommended to use wire rope scissors to cut the chrome steel rope. You will thus achieve a perfect, clean cut with little power usage. Fanning out at the end of the rope is also prevented.
